

EUROPA V

Welcome Aboard

The external line of the Canados 70S designed by the Studio Spadolini in Florence, is marked by the particular inclination of the transom. The increase in the waterline improves the performances of this motor yacht which, although making use of advanced materials and concepts, always represents a classic and refined way of living the sea.

Elegant Atmosphere

The pleasant sensation of roominess which is felt entering the saloon of the Canados 70S, is the result of the open space criterion which joins the dinette with the living room. Two settees, one in front of the other, make the conversation among the guests easier. The use of natural leathers and of valuable woods is one of the standards of the yard.

Comfortable Apartments

One of Canados essential characteristics is the execution of the interior decoration according to the liking and the specific requirements of the owners. Therefore, the esteemed woods, the ceiling coverings, the upholstery and even the division of the rooms are studied and agreed upon with the owners from time to time

Fine Dining

Adjacent to the saloon, an elegant dining area awaits guests for more formal dinners and lunches. The beautifully set table and impeccable service, combined with the creativity and skill of Intuition's on-board chef, will contribute to a truly unique gourmet experience.

Specification

TECHNICAL SPECIFICATION
